Isolation of the nuclear yeast genes for citrate synthase and
fifteen other mitochondrial proteins by a new screening method
EMBO J. 3 (8), 1773-1781 (1984)
                                                                                                                                                                                                                                                                               SCMTCISNA 1481 bp DNA PLN 17-FEB-1997
S.cerevisiae mitochondrial citrate synthase gene, complete CDS.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  /db_xref-"SGD:L0000341"

Mean 9.616; Variance 7.859; scale 1.224 Statistics:

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

## ALIGNMENTS

```
DNA encoding plant citrate synthase - used to regulate flower formation,
                                                                                                                                                                                                                                                                                                                                           to improve storage of tubers, etc. and to reduce sprouting claim 7; Page 60-63; 87pp; English. To identify a CDNA from tobacco which codes for citrate synthase, a cDNA bank of leaf tissue from tobacco was prepured plaques of this cDNA bank were screened using a radioactive DNA probe which comprises Solanum tuberosum citrate synthase cDNA probe which comprises Solanum tuberosum citrate synthase cDNA (104199). One of the clones was sequenced. The nt. sequence is given in T04201.
                                                                                                                                                                                                                                         (AGRE ) HOECHST-SCHERING AGREVO GMBH.
